Dear Club Members,

Do you know what percentage of spa-goers are men? Many people are surprised to find it's now 30 percent-and the number is increasing every year!

Since this Sunday is Father's Day, I thought it was a good time to share these spa tidbits about males.

- Their favorite spa treatment: a massage.
- Their number one spa complaint: "The robes are too small!"
- Men think of spas for [medical](#) solutions more than pampering.
- Men like hair waxing-especially on their backs.
- Eyebrow shaping is becoming more popular for men who have "unibrows" (two brows that merge).
- There are now [men-only spas](#); and in New York there's even a mobile skincare spa service for fellows, Gents, LLC.

Why not introduce your favorite dad to a spa – or indulge his spa habit? [Spa Finder Gift Certificates](#) are great gifts for stressed-out males. (And you can send a last-minute e-card, too). The details are at [Spafinder.com](#). And Dad can visit the site to find a special category for spas that are especially popular with [men](#).

Happy Father's Day to all the dads – and thanks to them for all that they do.

For our health,

Susie Ellis
